

# MSU Professor Mark Skidmore was exonerated by MSU; his landmark paper showing over 250,000 killed by the COVID vaccine is now back in the peer-reviewed literature

 [Send to Kindle](#)

Michigan State University Professor Mark Skidmore was exonerated of all ethics charges after a 7-month investigation. His paper was revised and was reinstated in the peer-reviewed literature. It revealed that over 250,000 people were killed by the COVID vaccine. Others have found similar numbers.

Mark Skidmore wrote a paper that showed that 217,000 Americans were killed in 2021 by the COVID vaccine.

The journal retracted the article and Mark's university commenced a 7-month investigation into unethical behavior by Professor Skidmore.

Today, I'm pleased to announce that Professor Skidmore has been exonerated on all charges and his paper, with some helpful additions suggested by Dr. Susan Oliver (and her dog, Cindy), has now been published in another peer-reviewed journal.

See this [press release](#) that Mark sent me.

The press release was drafted by the [Liberty Counsel](#) who was instrumental in defending Mark in the investigation by Michigan State University. If you want to support their work, please [donate here](#).

Bottom line: After a 7-month ethics investigation, Michigan State University found that Mark did nothing wrong!

Note: What this really means is that they tried for 7 months to find something they could nail him on, and they failed.

[COVID-19 Illness and Vaccination Experiences in Social Circles Affect COVID-19 Vaccination Decisions.](#)

Here is an excerpt:

With these survey data, the total number of fatalities due to COVID-19 inoculation may be as high as 289,789 (95% CI: 229,319 – 344,319). The large difference in the possible number of fatalities due to COVID-19 vaccination that emerges from this survey and the available governmental data should be further investigated.

Let me translate that for you. Here's the "plain English" version (my embellished interpretation):

"Our survey showed that there's a good chance that 290,000 Americans (and maybe as many as 344,000) may have lost their lives due to taking the COVID vaccine and that's in 2021 alone! That's a lot of people and it's a lot more than the US government claims. And for the record, this isn't the only survey that found this. For example, the [Rasmussen survey found a similar number of people were killed by the vaccine and the virus](#). So did [other firms](#). So how come there isn't an investigation to determine conclusively who is telling people the truth here? What's wrong with you people? Instead of trying to censor the data, maybe it is high time we started talking about it so we can finally determine who is telling the truth and who is lying to you."

Here are [the previous articles](#) that I've written about Mark Skidmore's paper.

If you have time to read only two articles, here are the top two I'd recommend:

The article, "[What the "Defenders of Science" Miss About the Purpose of Scientific Peer-Review and the Open Dialogue: When You Censor or Support](#)

[the Censorship of Dissident Voices, You Are In the Wrong](#)” is an excellent summary also of how papers such as Mark’s, are retracted unethically.

Here’s an article recapping the whole thing by James Lyons-Weiler: [Dr. Mark Skidmore Exonerated](#)

## Popular Rationalism

Mark would like to thank [Dr. Susan Oliver \(and her dog Cindy\) for all their helpful suggestions](#). Susan was nice enough to make a [helpful video](#) for Mark to ensure that even the most nit-picky peer-reviewer wouldn’t be able to find any errors.

Mark incorporated her suggestions into his revised paper to make it even stronger.

So it’s now back in the scientific peer-reviewed literature that over 250,000 people were killed by the COVID vaccine in 2021 alone.

Other independent surveys (like [Rasmussen](#) and [the outside surveys I’ve done](#)) all are consistent with those numbers that the vaccine killed a comparable number to the virus. So that’s very validating of Mark’s numbers.

So how are they going to explain the results which are verifiable and which can be replicated?

Answer: They will not. They will ignore it. Because they cannot explain it. Gaslighting people on this is too hard. That's why they had to get the paper unethically retracted when it came out. Now that it's out, they will ignore it. No fact checks, nothing. Silence.

Please help share the good news about Mark Skidmore with others. It's important we let the world know that their governments have been lying to them.
